Motor Specifications:

Single-Speed Hydraulic Gear Motors
Maximum System Pressure: 2500 psi (172 bar).
Motors are internally drained and generally don't require a case drain. Both the code '23' and code '59' motor are limited to 500 psi due to a high-pressure seal. If the back pressure exceeds this limit, a case drain is required.

Torque and Speed Charts:

77BA With 23 OR 59 Motor

77BC With 23 or 59 Motor

77BD With 23 or 59 Motor

- * Starting torques are approximately 25% less than running torque.
- * Torque and speed charts are based on analytical calculations that use average gearbox and motor efficiencies.
- * System back pressure will reduce running torque proportionally.
- * Consult Eskridge Representative for Torque and Speed Charts for your specific application.
